

ORANGEVALE VETERINARY HOSPITAL, INC.

FRESH CHILLED SEMEN RELEASE OF LIABILITY

Orangevale Veterinary Hospital, Inc. makes no guarantees, expressed or implied, that conception will occur. The fresh chilled semen is evaluated at the time of the collection and those results are on the semen report included with this shipment. Orangevale Veterinary Hospital, Inc. does not guarantee that the fresh chilled semen is viable or will remain viable at the time of arrival. We do everything to insure that it does, however, we have no control over the shipping and handling from the time that the semen leaves the hospital, nor the unpacking and warming preparation of the semen for insemination. Rough handling or improper storage can severely damage the semen. We very carefully package the fresh chilled semen to prevent leaks by using para-film over the tightened cap of the vial, and inserting the vial in a sterile zip-lock bag to further protect the semen in case the tube leaks, which occasionally happens. It is then packaged with bubble wrap and ice packs in a special semen shipping box to keep it at the proper temperature. The shipment should always be sent for overnight delivery. In the event of loss or poor semen quality upon arrival, Orangevale Veterinary Hospital, Inc. will not be held liable for the loss or the replacement value of the semen or the shipping.
